of your vehicles, such as fuel consumption, service and parts. It is packed in a professional interface and sports some powerful options and handy configuration parameters. Simple setup and professional UI The installation procedure is a fast and uncomplicated task that shouldn't impose any difficulties. As far as the interface goes, Vehicle Manager is wrapped in a large window with a neatly organized structure, where you can get started by filling the database with vehicles. Specs for a 2014 Chevrolet Camaro Z28 are written to give you an idea of how the app works. Edit vehicle data and monitor a fuel log It is possible to edit vehicle information related to the model, year, odometer, make, color, driver/operator, type,

---

department, license and registration, insurance, engine, transmission, tire size, and notes, among others. You can also attach a local picture file. In a separate area you can monitor a fuel log after adding entries with the fill up date, US gallons, starting and ending odometer, odometer change, total cost, notes, brand, type, driver, state, as well as whether it was a complete fill up and for business purposes or not. The software tool shows total fuel cost and average fuel efficiency after taking into account all entries. Set up and monitor a service schedule and log. Similarly, it is possible to follow a service schedule after adding new entries to the list with the service item, frequency, next due, reminder, notes, and attachments (if

---

necessary). You can compile a report based on a specified date range and next due date, as well as export it to file. The service log is no different from the fuel log. Vehicle Manager lets you enter a service item, date, odometer, notes, expenses and file attachments, after which you can generate and export reports to file. Add vehicle parts, materials, personnel, vendors, and contacts In addition to the previously described sections, you can put together a database with vehicle parts and materials to keep track of, attach extra files deemed as important for the inventory overall, create a list with personnel, vendors and contacts, and generate multipur

Automobile maintenance management system for managing your vehicles. This application is not only a complete tracking system for every kind of vehicle, but also offers a wide array of options for organizing the data on your vehicles.

### Vehicle Repair & Track Service

Professional is the right choice for repair and tracking maintenance. You can track and view the progress of service activities, as well as the times and activities of each vehicle department. You can create service and repair schedules based on the status and update the system to make sure that the scheduling information is up to date.

### Vehicle Repair & Track Service

---

Professional can help you manage your service and repair operation. Each vehicle is assigned to one of the departments of the service department (e.g. Body, Paint, Mechanic, etc.) or a specific time slot (e.g. Morning, Noon, Afternoon, Late Evening). The system tracks each service activity and each job performed by each vehicle department, so you can see in a very clear and detailed way the progress of each vehicle service. With a repair & tracking maintenance software you can view and manage a list of vehicles, the service history for each vehicle, which vehicle parts are due for repair, and more. You can view a list of service jobs that have been scheduled, which vehicle has been assigned to which service job, or which vehicle has

---

been attended. You can schedule a service job based on the vehicle service history, based on a schedule, or manually. You can generate a weekly, monthly or yearly service log. General Features: Create and manage a vehicle list Create and manage schedules Track vehicle service and repair operations View vehicle service history and vehicle parts history Manage vehicle parts for each vehicle Vector manager is an easy-to-use software tool to manage vector graphics files. The app allows you to upload, create, view and generate vector graphic files. The program can be used for such purposes as designing brochures, posters, logos, websites and advertisements, designing clothing and accessories for different activities, game

---

graphics and video, graphic design and animation, maps and diagrams, website graphics, etc. The program supports all major graphic file formats, including AI, EPS, PDF, SVG, PS, PNG, JPG, GIF and BMP. Vector manager comes with a powerful vector graphic editor. The main window is organized into toolbars on the top edge of the program window. From the left, you can access various layers, edit functions, dimensions, trimming and more. The layers are used

#### **What's New in the Vehicle Manager Professional Edition?**

Vehicle Manager is a robust software application designed to help you keep track of your vehicles. It is equipped with several customization options, and allows

---

you to fill the database with all your vehicles as well as to track them at a glance. Specifications for a 2014 Chevrolet Camaro Z28 are provided so that you can get a sense of how the app works. You can view a list of all of your vehicles with their average fuel efficiency, total fuel cost, and notes. You can also monitor service logs, fuel logs, service schedules, and vehicle parts inventory, among others. The software is designed to simplify the process of keeping track of your vehicles and their parts. Main Features Display a list of all vehicles registered in your vehicle registry, including a list of model, year, make, odometer, average fuel efficiency, total fuel cost and cost per gallon, notes and mileage. Add, edit and

---

delete vehicles. Use tools to compare vehicles and adjust prices and depreciation. Set up and monitor service schedules. Add, edit and delete vehicle parts and materials. Add, edit and delete personnel, vendors, and contacts. Set up and monitor a fuel log. Fill in a fuel log with odometer, US gallons, starting and ending odometer, cost per gallon, total cost, notes and vehicle type. Add vehicle parts, materials and a service history. Generate and export reports. Set the default currency, volume, efficiency and odometer. Save, edit and restore databases. Protect, password-protect and export/import databases. Examine vehicle history and information. Visit the manufacturer's website to see

---

specifications and order information. Run benchmark tests. System Requirements Mac OS X Platform Mac OS X 10.6 or later When I try to open or close the Vehicle Manager Professional Edition, the application just hangs and then quits, with the message Simba: Can't connect to [www.steampowered.com:80](http://www.steampowered.com:80). Installation of this product has also caused trouble for me: the computer gets so slow that the System > Control Panel > Performance menu is not even visible. No support is offered for the professional version of this product. After installing this software, the computer repeatedly locks up and reboots. Every time I download a new version, the application won't run. Not even in Safe Mode. Microsoft is conducting an online
