Description of the Related Art In recent years, a wide range of pneumatic tires have been developed. Also, those tires having excellent steering stability have been developed. However, the tires having excellent steering stability are not necessarily always obtained. Especially, as a tire, which is installed on a vehicle having a low aspect ratio, a tire having satisfactory steering stability has not been developed. In order to improve the steering stability of the tire, for example, it is proposed to apply a tread rubber having the same or similar composition as that of the tread rubber on the shoulder portion of the tire. This technique is disclosed in the Japanese Patent Application Laid-open No. 2005-151675. In the case of the tire disclosed in the above-mentioned Patent Literature, however, the steering stability is deteriorated.Bill O'Reilly Bill O'Reilly, who stepped down as Fox News anchor in 2017 a1d647c40b
