The latest Splinter Cell multiplayer is perfect. In co-operative mode, you play as either a male or a female. While in multiplayer, players work in teams of one to three each. In a multiplayer match up, you control a splinter cell spy's actions in the context of a designated mission. With a Single Player Mode to take you through the game's campaign, you can play as Sam Fisher or as a new female agent called Jane Fisher. You play through ten missions with a focus on stealth and evasion. There are three different game modes that you can play: Cold War, Chaos Theory or Blacklist Mode. There are two different versions of the game with five different levels of difficulty. The Game can be played for a full thirty five hours or for ten missions. In Cold War Mode, the two players must work together to complete the mission, but in Chaos Theory Mode, you work together with your teammate to complete the mission, but you also work against them. Blacklist Mode takes everything from Cold War Mode and just builds on it. In Blacklist Mode, both players work together to complete the mission. If the players work against each other, the one who pulls a mission first wins. Also, if both players are killed, the round is over. The matchmaking for every mode is very tight. It's difficult to screw up in a game of Blacklist Mode, since you and your teammate are trying to finish the mission and if you die, you fail the mission. When playing Cold War Mode or Chaos Theory Mode, the matchmaking is very tight also, but if you happen to be on a higher level of difficulty, it's much more difficult to be a loner. Also, you can select different objectives for the game. You can play the game cooperative, but you can also play the game adversarial. With co-op, you work together to complete the mission. With adversarial, you work against your teammate and against the goal of the mission. The game has a bunch of different objectives to assign to each mission. The game has five different levels of difficulties. Level one is easy and the game is very simple. It's not a ton of fun. Level two is a little bit harder and it gets a little harder up
