----- PaintTool SAI is an intuitive and easy to use digital painting program, which provides all the basic features you can use for digital painting and more. One of the main features is the ability to use several layers to easily create complex paintings. You can paint on several layers which can be locked/locked, then combined into one work. Further, you can easily switch between all layers and even the invisible one. Besides layers, you have access to several specific painting tools and filters. All of them are very easy to use and the amount of control that they provide you with is incredible. Main Window contains everything you need The main window is well laid out and very easy to use. From left to right you have the following main items: Main Menu: PaintTool SAI contains a very well laid out menu. You can choose between the following options: New: This option opens a new, empty, image. Load: This option opens a file for loading into the program. Save: This option opens a file to save your work to. Quit: This option closes the program. Undo: This option undoes the last change you made. Redo: This option redoes the last undone change. Filter: This option provides the ability to select a filter to apply to the current image you are working on. Color Picker: This option allows you to quickly choose a color. Settings: This option gives you the ability to change some of the default settings for the tool. All of the main items in the window can be accessed using the tabs located at the top of the window. Layers: This tab contains your current active layer. Edit Layers: This tab allows you to do the following: Lock: This allows you to lock the layer to make it hidden. Unlock: This allows you to unlock the layer to show it. Change Opacity: This option allows you to change the current layer's opacity. You can set the layer's opacity level between 0 and 1.0. A higher number represents a transparent layer. Combine Layers: This option allows you to combine two layers into one. Combine To Shape: This option allows you to create a new shape by combining two layers. You can decide which layer goes where. Load Layers: This option allows you to load additional layers. Layer Mirror: This option creates a duplicated version of the layer.
