Recently, there is proposed a display device that makes it possible to display information on a front surface as well as a rear surface, for example. For example, an image forming apparatus, such as an electrophotographic copying machine or printer, is known which is provided with a transparent toner bag capable of supplying toner with a transparent front surface in order to supply toner to a developing unit and a developing unit for displaying an operation state. However, the transparent toner bag is made from the transparent resin, and the toner is dyed. Therefore, a problem is that the toner of the toner bag is different from the toner of a color toner cartridge. Accordingly, there is a need to hold an arrangement for supplying a desired amount of toner by using the toner of the color toner cartridge. For example

In a world where magic is commonplace, you are the child of a legendary champion, who belongs to a long-lived family that upholds the tradition of magic. Your family's financial state depends on your ability to take a difficult test, where your education and future are at stake. You have just turned 10 years old and it's time to enter high school. Your life begins to change when a new test will tell you whether you will attend the Magic Academy, where you will train with other students. However, your childhood friend Victor will have something to say about that. Thus, you must embark on an adventure to Kalmaruss to take part in a mysterious Challenge. About the Features: - Character customization: Get to choose your gender and skin color, as well as improve your appearance with respect to muscle mass, height, and body hair and shape, changing what's underneath. - Character proficiencies: Improving your character's skills will let you unlock new abilities and equipments. - Class system: This is a role-playing game with a variety of play styles. As a mall cop, you have to patrol the mall and manage to stay safe by not shooting yourself, as much as possible. Keep an eye on the remote cameras on your scanner but don't go too far because a killer is lurking inside the buildings and you may end up going mad. I'm a bit of a pessimist. In my not so short life I've seen too much to be that optimistic. That said, I'm leaving for the future. My living conditions are good, so good in fact that I haven't had a mood slump since the last time I visited my parent's grave in 2012. I have a lot to celebrate. I'm developing a game with a friend and we've already started working on it. I'm working as a game designer in India, a job that I'm lucky to have. I'm working for a company that's not just making an MS [Microsoft] exclusive game for public release, but a game that they're going to make a public release, too. I have some strange friendships but I'm working on it. I have the people and friends that I want, so I'm not worried about what's going to happen in the future. It's not just about me, it's also about my friends. I'm going to make sure they don't hurt. I will make sure the people who have a role in my life are alright. Thank you. "To me, the question isn't whether it's possible to create a successful game, but whether it's desirable. In my opinion, people who are only concerned about whether something is possible are missing out on the adventure of creating something. " - Jarno Träskelin Something really cool happened recently. We had a working game for longer than we'd ever expected. We did the whole development process ourselves in 3 months, thanks to the Level Pack SDK that allowed us to export our 3D assets in Unity. This project isn't finished, but we wanted to show some people. "Everybody has a dream. Some of them write theirs down, some of them record them on cassettes and draw them on cardboard. I'm okay with my dreams. I just won't let them get to me." - Bryan Lee O'Malley I read about this game last year and I got hooked. It's a game where the main protagonist is the creator himself. Isn't that the best thing to do? You will never get bored by yourself if
