The Elden Ring Cracked Accounts Game is an online fantasy action RPG based on the world of VALKYROS by Koji Owatari. The world of VALKYROS consists of the Lands Between which once flourished with the "Ancient Bloodline of Val" over a millennium ago. The lands were ravaged by a great catastrophe that caused them to become desolate, and in the midst of this disaster, a new power arose to change the destiny of the lands and was known as the Elden Ring. The lands then descended into a long period of history marked by war and strife, and the eras of the "Golden Age of the Elden Ring" and the "Dark Age of the Elden Ring". The game's story is based on the "lost memory" of the Elden Ring, in which the various thoughts of the characters are woven together. The tales unfold in fragments during the game, causing you to experience the lost memory of the Elden Ring. The Lands Between lie between two universes. In the Lands Between, the Elden Ring has existed for a millennium, and the great catastrophe that brought about its downfall thousands of years ago has faded to memory. Although the history of the Elden Ring over the last millennium is sealed in the "past", the memory of the Elden Ring still continues to live on in the "present", and the heroes of the Elden Ring are scattered all over this world. Enjoy the sense of danger and exploration in the Lands Between, and feel the power of the Elden Ring in this fantasy world. Kaidan: "Oh, great. This again. A subtle new Pokémon update that no one looks forward to."

It is also worth noting that when FE4 did this was news even back then. I remember a few of you folks complained then too, but even with that in mind this is just a different type of announcement than before. Last time that happened was Super Mario 64!
