As part of the improved AutoCAD functionality, the.fbx format is now fully supported and available to the free.fbx plugin. Maintaining and updating designs with AutoCAD MEP: Create and edit MEP (Mechanical, Electrical, Plumbing) engineering drawings with AutoCAD MEP, including all layouts, text, formulas, etc. (video: 1:23 min.) Receive structural design and MEP data updates from AutoCAD MEP, through an intelligent, intelligent process that stores complex changes directly within the drawing, meaning that they can be accessed as part of future updates to the design. Import and Sync Project Data: Save your designs to the cloud and sync your drawings to external systems. No more waiting for the project to be loaded! (video: 1:07 min.) With the new Project Data Import feature, you can save your project as an encrypted file and import it into any cloud system. After the file has been downloaded, it can be opened in AutoCAD as if it were still on your local system. Tool palettes and menus: Change the way you work with tool palettes, settings and menus. Jump to the current palettes without opening the menus, and manage tool settings (e.g. for multi-touch drawing). (video: 1:07 min.) With the new tool palettes, you can now manage your tool settings on their own - in a separate area that is stored in the drawing.
